TIPS FOR PRINTING & USE:

If possible, print on card stock and laminate or cover with clear contact paper for durability.

Ideas for use:

1. Print one copy of page 2 for each player, and one copy of page 3 back-to-back with page 4, for each TWO players. Give each player a playing board (page 2) and place cards in a loose pile between players, with the plain text sides (uncolored) facing up.
2. For easiest play, have players choose a particular card from the pile, or make it more challenging by having them close their eyes and pick a card at random. Cards drawn are then placed colored side up on a space within the same color circle, if one is still available. The winner is the first to cover their board.
3. FOR OLDER STUDENTS: Break into teams and give each team a playing board. Make copies of page 3 and cut into cards with blank backs. Have each team work together to come up with two items for each "sphere" until the board is filled. Which team is fastest?
