### TIPS FOR PRINTING & USE:

If possible, print on card stock and laminate or cover with clear contact paper for durability.

#### Ideas for use:

1. Print page 8 back-to-back with pages 9-12. Cut out around cards, shuffle, and place in a loose pile face-down between players.
2. Print enough copies of pages 2-7 so that each player has one. Duplicates are fine.
3. On each turn, players choose a card, read the math problem out loud and say the answer. If they have the answer open on their board, they may cover the space with the card. If they do not, they may return the card to the pile and shuffle it up a bit.
4. The winner is the first player to cover all nine spaces on their playing board.
